PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3.5+ years of hands-on experience in Magento 2, Laravel, PHP, JavaScript, Shopify, and WordPress. Specialized in e-commerce platform development, Hyva theme migration, custom module development, PDF invoice generation, barcode/QR code integrations, SMTP email automation, and RESTful & GraphQL API development. Experienced in cloud server migration (Cloudways to Cloudflare) and Linux Ubuntu server administration (21.04–24.04). Currently serving as System Support Executive at Mindbridge, ensuring seamless IT operations and high end-user satisfaction.

WORK EXPERIENCE

Mindbridge | System Support Executive | Oct 2025 – Present (6+ months)

- Provided first and second-line technical support, resolving hardware, software, and network issues for end-users.
- Managed incident tickets, ensured SLA compliance, and maintained detailed IT support documentation.
- Performed system monitoring, health checks, and proactive maintenance of IT infrastructure.
- Configured and deployed workstations, peripherals, and business applications for new employees.
- Collaborated with cross-functional teams to troubleshoot escalated issues and implement resolutions.
- Supported user onboarding, training sessions, and knowledge-base article creation for recurring issues.

Nexus / Banyo Technology | Magento 2 / Laravel Full Stack Developer | Mar 2024 – Oct 2025 (1.5 years)

- Led full frontend migration of banyo.co.uk, premierdiy.co.uk, and nexus-home.com from Porto theme to Hyva framework, improving page speed and Core Web Vitals scores.
- Identified and resolved multiple Porto-specific module compatibility bugs that broke after the Hyva migration, ensuring full storefront functionality post-migration.
- Overrode the default Magento 2 product listing grid and built a custom product grid displaying extended product details (specs, descriptions, availability), improving user experience and conversion.
- Deployed and configured multiple purchased third-party Magento 2 extension modules; customized their functionality to align with specific business workflows.
- Developed a custom UK postal code-based dynamic shipping calculator: delivery charges calculated automatically based on distance from the warehouse to the customer's delivery postcode — the farther the location, the higher the charge.
- Configured and added multiple delivery methods in Magento 2 alongside the shipping calculator, enabling flexible fulfillment options for customers.
- Migrated full database and Magento 2 application from Cloudways server to Cloudflare, ensuring zero data loss and minimal downtime during the transition.
- Built RESTful and GraphQL APIs for front-end and third-party service integrations.
- Managed Git version control workflows including branching, pull requests, and code reviews on GitHub/GitLab.
- Used Linux Ubuntu (22.04 / 24.04) as the primary development and deployment environment throughout the project.

ASquareTec | Full Stack Magento 2 / Laravel Developer | 2021 – Mar 2024 (2.3 years)

- Developed a custom Magento 2 payment invoice module for gozaky.sa: invoices auto-generated on order placement with full order details and exported as downloadable PDF files.
- Performed complete Magento 2 theme customization for gozaky.sa: layout XML overrides, custom UI components, and responsive styling using CSS/LESS.
- Built a warehouse product management feature for the-healthy-grocer.com: implemented a camera-based barcode and QR code scanner on the product page that fetched full product details (rack/shelf location, stock quantity, product image) from a single scan — eliminating manual warehouse lookup.
- Integrated SMTP-based automated email system for the-healthy-grocer.com: customers received formatted invoice emails automatically on order confirmation.

- Developed MyCellar (mycellar.com) on Laravel: a mobile product-selling platform with a merchant dashboard enabling clients to add/edit products, manage promotions, apply theme changes, and configure store settings.
- Developed and deployed helafit.com on Shopify: implemented custom theme, product pages, and store configuration.
- Built asquaretec.com on WordPress with custom plugins, page layouts, and branded email templates for client communication.
- Managed product data entry and content management across multiple client stores: added/updated products, uploaded banners, and configured homepage content via admin dashboards.
- Used Linux Ubuntu (21.04 – 24.04) as primary OS for all development, testing, and deployment tasks.

Abacus Consulting | IT Support Engineer | 2023 – 2025 (2 years)

- Diagnosed and resolved hardware, software, and network issues for 100+ end-users.
- Built and deployed internal Laravel applications: Attendance Portal and Ticketing Portal for Abacus Technology operations.
- Deployed and configured Linux Ubuntu servers for internal application hosting and IT infrastructure.
- Performed system backups, security patch management, and routine maintenance tasks on schedule.
- Implemented access control measures and security protocols to protect organizational data.
- Created IT process documentation and trained staff on new systems and applications.

TECHNICAL SKILLS

Backend: PHP (Core & OOP), Magento 2, Laravel, RESTful APIs, GraphQL, Eloquent ORM, Middleware, SMTP Email Integration

Frontend: HTML5, CSS3, Bootstrap, JavaScript (ES6+), React.js, Vue.js, Node.js, Express.js, Webpack, Hyva Framework

Database: MySQL, Query Optimization, Database Design, Data Modeling

CMS / eCommerce: Magento 2 (Custom Modules, Plugins, Hyva Theme, PDF Generation, Barcode/QR Integration), WordPress (Plugins, Email Templates), Shopify

Cloud & DevOps: AWS (Server Migration), Cloudways, Git, GitHub, GitLab, Postman, Swagger, Linux Ubuntu (21.04–24.04)

IT Support: Troubleshooting, Network Management, System Administration, Active Directory, SLA Management, Documentation

KEY PROJECTS

gozaky.sa — Magento 2 | ASquareTec

- Built a custom PDF invoice generation module — invoices auto-created on order placement with complete order details and available for customer download.
- Performed full Magento 2 theme customization: layout XML overrides, custom UI components, and responsive CSS/LESS styling.

banyo.co.uk / premierdiy.co.uk / nexus-home.com — Magento 2 + Hyva | Nexus

- Migrated all three storefronts from Porto theme to Hyva frontend framework for improved performance and modern architecture.
- Fixed multiple module compatibility bugs that arose after Porto-to-Hyva migration, restoring full site functionality.
- Built a custom Magento 2 product listing grid override displaying richer product information compared to the default grid layout.
- Developed a UK postal code-based dynamic shipping rate calculator: delivery charges computed automatically based on distance from warehouse to customer postcode.
- Configured and integrated multiple Magento 2 delivery methods alongside the custom shipping calculator for flexible fulfillment options.
- Migrated full database and Magento 2 application from Cloudways to AWS — ensuring data integrity, zero data loss, and minimal downtime.
- Deployed and configured purchased Magento 2 extension modules and adjusted their functionality per business needs.
- Managed product data entry, banner uploads, and homepage content updates via Magento 2 admin dashboard.

the-healthy-grocer.com — Magento 2 | ASquareTec

- Developed a warehouse product management feature: camera-based barcode and QR code scanner on the product page that retrieves rack location, stock level, and product image from a single scan.
- Integrated SMTP-based automated email system: customers receive invoice emails automatically on order confirmation.

MyCellar (mycellar.com) — *Laravel* | *ASquareTec*

- Developed a full-featured merchant dashboard for a mobile product-selling platform.
- Features: product add/edit/delete, promotion management, dynamic theme customization, and store settings configuration.

helafit.com — *Shopify* | *ASquareTec*

- Developed and deployed a fully functional Shopify store with custom theme setup, product configuration, and store settings.

asquaretec.com — *WordPress* | *ASquareTec*

- Built the company website on WordPress with custom plugins, structured page layouts, and branded email templates for client communication.

Attendance & Ticketing Portals — *Laravel* | *Abacus Technology*

- Built internal Laravel web applications for employee attendance tracking and IT support ticket management.

Linux Server Deployment — *Ubuntu* | *Abacus Consulting*

- Installed, configured, and managed Linux Ubuntu servers for internal application hosting and IT infrastructure.
- Maintained Linux Ubuntu (21.04 through 24.04) as primary development OS across all projects from 2021 to present.

EDUCATION

Bachelor of Science in Computer Science | National College of Business Administration & Economics | 2022 – 2024

- Coursework: Mobile Application Development, Web Development, Software Project Management

Associate Degree in Computer Science (ADPCS) | The Superior University | 2020 – 2022

- Coursework: HTML & CSS/Bootstrap, Data Structures & Algorithms, Database Management Systems
